

NSF IGERT students participate in Bioenergy Conference in Milan, Italy.

Left to Right: Leidy Pena, Ph.D. student in Biological and Agricultural Engineering, John Stanford, Ph.D. student in Chemical Engineering, Leslie Schulte, Ph.D. student in Chemical Engineering, Liz Boyer, Ph.D. student in Chemical Engineering.

These four IGERT students participated in the [20th European Biomass Conference and Exhibition](#) in Milan, Italy from June 17 – 23, 2012.

The European Biomass Conference ranked on top level of the world's leading events in the biomass sector. 332 keynote, plenary, oral and parallel events presentations, 12 parallel events were held during the week, covering all aspects of biomass and bioenergy. The Exhibition showed the newest products and technological developments in the biomass sector with 64 exhibitors and 28 exhibitors' presentations. The discussions focused on current topics like Biomass Resources, R&D on Biomass Conversion Technologies for Heating, Electricity and Chemicals R&D on Processes for Solid, Liquid and Gaseous Fuels from Biomass, Industrial Demonstration and Business Concepts, Biomass Policies, Markets and Sustainability.
